(54) **Light transmitting laminated plate for electromagnetic shielding**

(57) An electromagnetic-wave shielding and light transmitting plate or a panel laminated plate is formed by interposing an electromagnetic-wave shielding and heat ray blocking layer between two transparent base plates or between a transparent base plate and a PDP body and integrally bonding them together by adhesive

intermediate films. The electromagnetic-wave shielding and heat ray blocking film is made by laminating oxide transparent conductive films and metal thin films in nine layers on a base film, or further laminating a titanium nitride film and an oxide transparent conductive film on a multi-layered film composed of oxide transparent conductive films and metal thin films on a base film.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 00 30 4394

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.

14-12-2001
